

# DATA GLOSSARY

**Expected Progeny Difference (EPD)** is the estimate of how future progeny of each sire are expected to perform in each of the traits listed. EPD is expressed in pounds, either plus or minus.

**Birth Weight EPD (Birth)** A guideline to follow is: +2.0 & down heifers & cows; +2.5 to +3.5 heifers calving under supervision and cows; +3.5 & up mainly cows.

**Weaning Weight EPD (Wean)** expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny.

**Weaning Weight Maternal EPD (Milk)** is a predictor of a sires genetic merit for milk and mothering ability as expressed in his daughters.

**Weaning Weight (Adj. WW)** is adjusted to 205 days.

**Yearling Weight (Adj. YW)** is adjusted to 365 days.

**Ribeye Area EPD (Ribeye)** Cross-sectional area of the longissimus dorsi muscle (ribeye area) at the 12th rib has been shown to account for a significant amount of variation in percent retail product at a constant carcass weight end point. This means that given two sires with the same carcass weight EPD, the sire with the higher EPD for ribeye area will have progeny that yield more percent retail product. The genetic correlation between ribeye area and percent retail product as estimated from the Angus field data is +.52. There is an even higher positive genetic correlation (.72) between 12th rib ribeye area and pound of total retail product as reported from research finding. Heritability for ribeye area has been estimated at .28 from the Angus carcass data base.

**Marbling EPD (Marb)** The marbling score EPD can be used to select sires that will produce progeny with more marbling at a constant fat and age endpoint. The higher the marbling score EPD, the higher the amount of intramuscular fat in the ribeye. It should be noted that the genetic correlation between marbling score and external backfat at the 12th rib is nearly zero. This means that breeders can select for increased marbling and not have to worry about selecting for increased external fat when taking animals to an age-constant end point.

## RETAINED INTEREST IN BULLS

Oliphant Angus is retaining a 1/2 semen interest in all of the bulls in this sale. Because it generally takes several years for a sire to be "discovered", we feel we can help our customers through various programs, "find" and "market" bulls, that float to the top.

You will own full possession and 100% salvage value of the bull. We are retaining the right to half the semen sales revenue from the bull if sometime in the future, semen sales become a possibility. If for some reason you should sell the bull to another breeder, Oliphant Angus still retains that 50% semen interest. If you purchase a partnership bull and wish to have semen collected for your own herd use, that semen is 100% yours, unless you contact Oliphant Angus and we agree to have him collected in a joint venture. If the bull is collected in a joint venture we split the semen production cost and the revenue of sales on a 50/50 basis. However, if you are not interested in collecting semen on the bull, Oliphant Angus will have the right to collect the bull for their own use and will pay expenses for collection(s). We will have him collected at your convenience.

## *Special Thanks To:*

Cross Country Genetics, Dr. Kirk Gray and Staff for all of their embryo transfer work, Westmoreland, KS (785) 457-3336.

Paul Ritter for his ultrasound carcass evaluations.  
Winter Livestock family and staff for the facilities and all their wonderful help.

Joe Hite for cattle clipping and freeze branding (316) 799-2128.

My wife Connie for all she has done and for helping with many new things.

To my kids for their constant proof that life is worth the time you put into it.

Thanks to our farm and ranch help for their extraordinary help and care for what they do for us.

To my father for all that he does here with the cattle and family and for being a great Christian, father and grandpa.

To my late Mother, thanks for being a great lady, role model and Christian. I know all those you helped, that went before you, were there to thank you for caring and welcomed you to heaven. It was better than you imagined!!!

Thank you all!

*David Oliphant*

Our breeding philosophy does just as stated - offers you profits from the genetics in your calf crops sired by Olphant bulls. How? We use proven sires, with proven performance and EPDs, resulting in offspring with a predictable return.
